

PLASTIC STORAGE BINS

PLASTIC STORAGE BINS come in a huge range of sizes, shapes and configurations to suit your storage requirements and available space. For more detailed information and full specifications visit our website: palletrackingsolutions.co.nz/product/plastic-storage-bins

Wall Mounted Bins

These have a back hinge for mounting on louvred panels. They are stackable with open fronts for easy access and visibility for quick parts picking. Made from durable, lightweight high density polypropylene, these bins are waterproof, rustproof and UV resistant. Suitable for small parts storage. Labels and dust proof plastic covers available.

Interlocking Bins

Stack or interlock to create stable storage without shelves. Open fronts allow quick parts picking. Bins can be connected horizontally or vertically via plastic pillars. Made from durable, lightweight high density polypropylene, these bins are waterproof, rustproof and UV resistant. Suitable for small parts storage. Labels and dust proof plastic covers available.

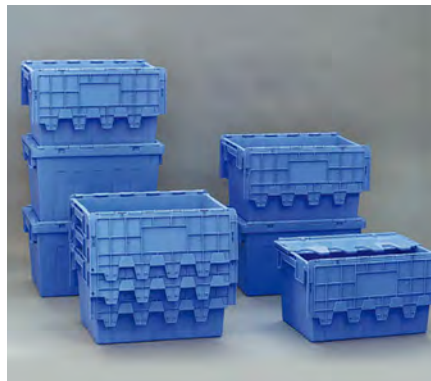

Sliding Bins

These space saving bins stack on top of each other and slide to access contents. The reinforced ribs, solid base and a stacking edge make them highly functional. Made from durable, lightweight high density polypropylene, these bins are waterproof, rustproof and UV resistant. Dividers, labels and dust proof plastic covers available.

Stackable Containers

These bulk storage bins have barrier free handles for easy loading or carrying. Smooth inner walls make them easy to wash and bottom reinforcement provides stability on wheels. Made from durable, lightweight high density polypropylene, these bins are waterproof, rustproof and UV resistant. Lids and dolly wheels are also available.

Nesting Containers

Include interlocking lid, practical handle, reinforcing bar to increase load capacity, a non-slip base and a one-time anti-theft lock. Empty contains can be easily nested to save space. Made from durable, lightweight high density polypropylene, these bins are waterproof, rustproof and UV resistant. Suitable for supermarkets, food, medical, light industry.

Collapsible Containers

The key feature of these containers is that they fold down to between a quarter and a third of their full size to save space. They are also easy to re-assemble. Made from durable, lightweight high density polypropylene, these bins are waterproof, rustproof and UV resistant. Suitable for supermarkets, shopping malls, light industry, and the food industry.

WHY PRS? We're a proudly NZ owned and operated company. We build better businesses by solving storage problems nationwide. If you're looking for experienced storage advice, quality products, service and installation – our team's here to help.
