Everything, in its place

WIRE MESH SHELVES

Wire mesh shelves are incredibly strong with a zinc plated finish for long lasting durability in dry or refrigerated environments.

Specifications	Key features	Applications
Length to match any beam length	Four in-welded pallet support bars per shelf	Non-palletised loads
Width to match any frame dimension	Holds up to a 1,000kg uniformly distributed load per shelf (2 shelves per beam level)	Irregular sized pallets
Waterfall fit to beams for safe and secure positioning	Improves light and airflow. Don't attract moisture	Boxes
	Improves fire safety by allowing for sprinkler access	Loads not deep enough to sit on beams
	Reduces dust build up	Small sized pallets
	Easy to install	

Accessories

- **Vertical Dividers** – ideal for creating sections within your bays, clip dividers are easy to set up. Dividers can be made to run front-to-back or left-to-right, depending on your specific storage needs.

In-welded pallet support bar

Vertical dividers

MDF shelves are a cost-effective solution that will fit any size configuration. The solid surface prevents small items falling through shelves.

Specifications	Key features	Applications
Length up to 4m per sheet	Any size configurations achievable	Pick levels in racking
Width up to 1350mm per sheet	Compatible with both box and step beams	Work bench
18mm, 25mm or 30mm thick	Cost-effective solution	Non-palletised storage
	Doesn't allow small items to fall through	Fabric storage

Accessories

- **Shelf support bars** – Provide additional support to MDF shelving for heavy loads
- **Pallet support bars** – allow storage of pallets which are not deep enough to fit on standard rack frame depths while providing additional support to standard pallets. Use two supports per pallet position.
- **Z Clips** – Securely fix MDF shelves to pallet racking box beams.
- **Pigeon hole dividers** – a highly effective, economical way to segment your shelving.

WIRE MESH CAGES

Sturdy and durable, yet lightweight, wire cages are invaluable when you need to store and move products in volume.

Specifications	Key features	Applications
H890mm x D1000mm x L1200mm	Rust resistant galvanised steel construction	Protect products from impact damage
1 tonne capacity	Feet wrap around the base – no sharp edges	Take the place of pallets in certain applications
	Stack up to 4-high – the container takes the weight, not the bottom pallet's contents	Storing loose parts
	Collapse for easy storage when not in use	
	Easy to keep clean to avoid contamination
