

STEEL SAFETY BOLLARDS

BOLLARDS protect against collision, block vehicle access and increase site safety. They're also a simple but effective security asset to keep your property safe against vandalism, ram raids and theft.

We have a variety of different sizes and materials available depending on your needs, including powder coated steel, galvanised and stainless steel.

The four bolt connection means our bollards are easy to install yourself or we have a team of installers nationwide who can take care of that for you.

Specifications	Key features
Powder coated steel 1050 x 114mm diameter and 200mm x 200mm baseplate Powder coated steel 1300 x 170mm diameter and 275mm x 275mm baseplate Galvanised 1050mm x 114mm diameter and 200mm x 200mm baseplate	Powder coated steel finish resists dust and scratches 4 bolt connection

STAINLESS STEEL BOLLARDS are perfect for indoor, high volume foot traffic areas, to increase site safety. These are ideal for retail spaces, supermarkets, airports, malls, commercial offices and food storage areas.

The stainless steel finish resists rust and scratches and the reflective film makes them highly visible.

Specifications	Key features
Stainless steel 1050 x 114mm diameter and 175mm baseplate	High quality professional finish 4 bolt connection
